EDUCATION

Master Of Computer Application, Ganpat University, Gujarat, India

[March-2018]

EXPERIENCE

Software Engineer - National Informatics Centre (NIC)

[Mar-2020 to Present]

Role: Backend and Frontend Development

- **Technologies:** Laravel, PHP, React.js, Node.js, HTML, PostgreSQL, CouchDB, CSS, Bootstrap, jQuery.
- Designed and implemented a fully-responsive, user-friendly, web application utilizing the above technologies.
- Here as a Software Engineer, I played a critical role in the end-to-end development and maintenance of sophisticated web applications. My responsibilities encompassed the full software development lifecycle, from requirement analysis to deployment.
- My tenure at NIC stands as a testament to my dedication, technical prowess, and my ability to drive impactful digital transformation initiatives within the public sector.

Tenure:

FullStack Developer, Velocis System Pvt. Ltd.

[Sep-2022 to Present]

- Developed a web application for the Gujarat Maritime Board, a Gujarat government PSU.
- Here I Developed various module like Employee Payroll, HR Management, GPF trust, Pension trust, Income Tax. These implementations have successfully **reduced processing times by 70% to 80%**, enhancing operational efficiency and productivity.
- **Led a team of 4 members**, effectively managing tasks and ensuring successful project completion.
- Developed an income tax and payroll module that ensures **100% accuracy** in employee income tax and salary calculations.

Software Application Support Engineer, Aeologic Technologies

[Sep-2021 to Aug-2022]

- Developed a web application for GERI, focusing on testing and investigation of construction materials, research and development, consultancy, and training in various areas of material testing.
- My role involved creating various test reading screens and generating output test results based on test criteria to verify material quality.
- The new system now ensures **100% accuracy** in results.

PHP Developer, Gujarat Infotech Ltd.

[Mar-2020 to Aug-2021]

- Developed a web application for the Finance Department of Gujarat government. This Software will facilitate the FD to monitor and review the activities/performance of the PSUs & other Entities in well efficient and scientific manner. This will improve the quality of submission of proposals/matters by the PSUs which subsequently reduces the time lag in processing/getting approval of the same.
- The new system is **over 200% faster** than the manual and corresponding processes.

Software Supporter Cum Developer, Bluemax Services Pvt. Ltd.

[Jan-2019 to Mar-2020]

- **Role:** Backend Development and System Support
- **Technologies:** VB, and SQL Server-2008

- In Bluemax Services, I managed and developed desktop-based applications tailored for municipal operations. These applications encompassed critical modules such as Marriage, Birth & Death records management and Area-based property taxation.

Web Developer, Silverwing Technologies Pvt. Ltd.

[Nov-2017 to Dec-2018]

- **Role:** Backend and Frontend Development
- **Technologies:** PHP, HTML, MySQL, CSS, Bootstrap, jQuery, JavaScript.
- Developed and maintained dynamic web applications using PHP and MySQL, ensuring seamless integration with front-end technologies and optimizing database queries for enhanced performance.
- Here I developed some major projects for Industries like, E-commerce, GPS Track Vehicle, laundry app, etc.
- This role provided me with a strong foundation in backend and frontend development, setting the stage for my career growth.

RELEVANT PROJECTS

Game Hub

Using **rawg.io API**, I have developed a game hub project where user can explore game using various filters like genres, platforms, sort by different criteria and toggle theme.

- **Role:** Frontend Development
- **Technologies:** ReactJS, Chakra UI, HTML, CSS.
- **Domin:** [My Game Hub](#)

Income Expense Tracker

Developed an income and expense management website enabling administrators to add categories and subcategories, while allowing users to register, log in, organize expenses, and generate detailed expense reports.

- **Role:** Backend and Frontend Development
- **Technologies:** NodeJS, Express JS, ReactJS, MongoDB, Chakra UI, HTML, CSS.
- **Domin:** [Source Code](#)

My Portfolio

Developed a personal portfolio for demonstration purposes..

- **Role:** Frontend Development
- **Technologies:** Next JS, Tailwind CSS.
- **Domin:** [Prakash-Dantani-Dev](#)
