📁 PROFESSIONAL SUMMARY

Senior Full Stack Developer with 8+ years of experience building scalable, secure, and high-performance enterprise web applications using **PHP, Laravel, Node.js, Express.js, React.js, JavaScript, TypeScript, PostgreSQL, MySQL, and MongoDB**. Skilled in designing **RESTful APIs**, developing responsive frontend applications, **optimizing database performance**, and implementing scalable software solutions across the complete Software Development Life Cycle (SDLC). Experienced in modern UI technologies including **Bootstrap, Tailwind CSS, and Material UI**, with a strong background in enterprise business applications, financial systems, team leadership, and delivering production-ready solutions in Agile environments.

🧠 SKILLS

- **Backend:** Node.js, Express.js, PHP, Laravel, REST API Development.
- **Frontend:** HTML, CSS, React.js, JavaScript, TypeScript, Bootstrap, jQuery, Chakra UI, Tailwind CSS.
- **Databases:** PostgreSQL, MySQL, MongoDB, CouchDB.
- **DevOps & Tools:** Docker, Git, GitHub, Postman, Slack.
- **Cloud:** AWS (S3, EC2)
- **Professional:** Agile, SDLC, Requirement Analysis, Team Leadership, Code Review, Deployment, Problem Solving

🎓 EDUCATION

Master Of Computer Application,
Ganpat University

03/2014 – 03/2016 | Gujarat, India

📁 EXPERIENCE

Government Enterprise Experience

Client Experience: National Informatics Centre (NIC)

Technologies: Laravel, PHP, React.js, Node.js, HTML, PostgreSQL, CSS, Bootstrap, jQuery.

Key Responsibility:

- Designed, developed, and maintained enterprise-grade web applications using Laravel, React.js, Node.js, and PostgreSQL.
- Managed the complete software development lifecycle, including requirement analysis, development, deployment, maintenance, and production support.
- Delivered scalable digital solutions for Government of Gujarat departments through National Informatics Centre (NIC), improving operational efficiency and supporting digital transformation initiatives.

Project: GPOFMS – Gujarat Maritime Board

Payroll Partners:

Senior Software Developer, Dev Information Technology Aug 2025 – Jul 2026

Full Stack Developer, Velocis System PVT. LTD. Sep 2022 – Aug 2025

Technologies: Laravel, PHP, Node, React, PostgreSQL, JavaScript, Tailwind CSS.

- Contributed to the development and maintenance of an enterprise web application for the Gujarat Maritime Board, a Government of Gujarat PSU.
- Delivered and enhanced business-critical modules including Payroll Management, Human Resource Management (HRMS), General Provident Fund, Pension Trust, and Income Tax Management. These implementations have successfully reduced processing times approximately 80% streamlined operational efficiency and productivity.
- Built payroll and income tax modules to automate salary processing and tax calculations that ensures 100% accuracy in employee income tax and salary calculations.
- Led a team of 4 members by providing technical guidance, code reviews, task planning effectively managing tasks for ensuring successful project completion.

Project: GERI– Gujarat Engineering Research Institute

Payroll Partners:

Software Application Support Engineer, Aeologic Technologies Sep 2021 – Aug 2022

Technologies: PHP, PostgreSQL, CouchDB, SSO, HTML, JavaScript, Bootstrap.

- Enrich a web application for GERI, focusing on testing and investigation of construction materials, research and development, consultancy, and training in various areas of material testing.
- My role involved creating various test reading screens and generating output test results based on test criteria to verify material quality.
- The new system now ensures 100% accuracy in results.

Project: PROOF System (Finance Department) – PSU Reporting Opportunity & Facilitation System)

Technologies: PHP, PostgreSQL, CouchDB, SSO, HTML, JavaScript, Bootstrap

Payroll Partners:

PHP Developer, Gujarat Infotech Ltd.

Mar 2020 – Aug 2022

- Architected a web application for the Finance Department of Gujarat government. This software will facilitate the FD to monitor and review the activities/performance of the PSUs & other Entities in a well efficient and scientific manner. This will improve the quality of submission of proposals/matters by the PSUs which subsequently reduces the time lag in processing/getting approval of the same.
- The new system is over approximately 200% faster than the manual and corresponding processes.

Private Enterprise Experience

Software Supporter Cum Developer, Bluemax Services Pvt. Ltd.

Jan 2019 – Mar 2020

Role: Backend Development and System Support

Technologies: PHP and MySQL

- In Bluemax Services, Maintained and improve web applications tailored for municipal operations. This application encompassed critical modules such as Marriage, Birth & Death records management and Area-based property taxation.
- Established the official website of **Sadguru Foundation**, implementing responsive web pages, dynamic content management, and performance optimizations using PHP, MySQL, HTML, CSS, JavaScript, and Bootstrap.

Web Developer, Silverwing Technologies Pvt. Ltd.

Nov 2017 – Dec 2018

Role: Backend and Frontend Development

Technologies: PHP, HTML, MySQL, CSS, Bootstrap, jQuery, JavaScript

- Developed and optimized dynamic web applications using PHP and MySQL, ensuring seamless integration with front-end technologies and optimizing database queries for enhanced performance.
- Here worked on business application include E-commerce, GPS Track Vehicle, laundry app.
- This role provided me with a strong foundation in fullstack development, setting the stage for my career growth.

SHOWCASE PROJECT

Game Hub

Role: Frontend Development

Technologies: ReactJS, Chakra UI, HTML, CSS.

Live Demo: [My-Game-Hub](#)

- Built a modern game discovery platform by integrating the RAWG.io API, enabling users to browse, search, and filter games by genre, platform, and multiple sorting criteria, along with a customizable UI theme for boost user experience

Income Expense Tracker

Role: Backend and Frontend Development

Technologies: NodeJS, Express JS, ReactJS, MongoDB, Chakra UI, HTML, CSS.

Source Code: [Income-Expense-Tracker](#)

- Built a full-stack income and expense management application that enables administrators to manage categories and subcategories while allowing users to securely register, authenticate, track income and expenses, and generate detailed financial reports.

Personal Portfolio

Role: Frontend Development

Technologies: Next JS, Typescript, Tailwind CSS.

Live Demo: [Prakash-Dantani-Dev](#)

- Designed and launched a modern, responsive portfolio website to showcase professional experience, technical skills, projects, and contact information with a clean and user-friendly interface.
